EDUCATION

School for Young Talent at the Royal Conservatory, The Hague

HAVO Diploma

September 2015 – July 2024

- Started at the age of 4 as a pianist at the School voor Jong Talent, Royal Conservatory, and graduated with a HAVO diploma specializing in piano performance. Received extensive musical education including private piano lessons, music theory, and choir, while excelling in economics, English, and Russian. This experience fostered discipline, focus, and creativity that continue to influence my growth.

PROJECT

Founder & Owner, DarkHosting

Aug 2020 – Oct 2022

- Founded and operated an online hosting service that provided game and web hosting solutions for FiveM, Minecraft, and other platforms.
- Managed the full lifecycle of the business, including server setup, VPS reselling, automation, customer support, and client onboarding.
- Configured and maintained Linux servers, specializing in Ubuntu, utilizing WHMCS and Pterodactyl for automated billing and server management.
- Provided hands-on troubleshooting and technical support to clients, resolving issues related to server downtime, configuration errors, and performance optimization.
- Handled the migration of client data between hosting providers, utilizing SFTP and other automation tools to streamline processes.
- Developed and implemented custom automations, scripts, and bots to improve service efficiency and reduce manual workloads.
- Leveraged cold outreach and partnerships to grow the customer base, ultimately providing hosting services to a variety of small to mid-sized clients.

Founder & Owner, Up Level Agency

Sep 2022 – Nov 2023

- At Up Level Agency, I developed innovative AI solutions for businesses, including custom chatbots and automated workflows using platforms like Voiceflow and Botpress. I gained hands-on experience integrating external APIs, building knowledge bases, and automating processes using Python scripts. Additionally, I conducted cold outreach via email marketing, which resulted in client meetings and a successful website project. This experience significantly expanded my skills in AI and automation, which I now apply to real-world projects.

SKILLS

- Server Management and System Monitoring - Skillful
- Linux Administration - Skillful
- Cloud Computing - Skillful
- Virtualization - Skillful
- Problem Solving and Troubleshooting - Experienced
- Customer Support and Client Relations - Experienced
- Cybersecurity and Privacy - Skillful
- Automation and API Integration - Skillful
- AI and Machine Learning - Experienced
- Prompt Engineering - Experienced
- Cold Outreach & Marketing Automation - Skillful
